MARCH-2016	**10th Secondary School Certificate (S.S.C)** SWAMI PARAMHANSH MADHYAMIK VIDYALAY 72%
February 2018	**12th Higher Secondary Certificate (H.S.C)** GYANODAYA VIDYA MANDIR Jr. College 46.15%
2018-23	**BSC (Computer Science)** V.P.M's R. Z. Shah College Mulund CGPA 6.24

PROJECTS

Billing Software Using python

The Billing System Project in Python is made to keep track of time and bills, as well as send out invoices for services and products.
It makes it easy for business owners to keep track of many invoices and accounts with just a few clicks of the mouse. It helps run a chain of stores and a billing system for more than one company.

Face recognition using using python without GUI

In this project, a fairly simple way is mentioned to implement facial recognition system using Python and OpenCV module along with the explanation of the code step by step in the comments.
Before starting we need to install some libraries in order to implement the code. Below you will see the usage of the library along with the code to install it:

Khaana Donation App

A food donation app developed using Java or Kotlin programming language can help connect donors and recipients of food donations. Here is a brief description of how such an app might function:
